Moderators

How Do I Know Who Is A Mod?

- All moderators wear a PINK bandana around their neck, arm, or head at all times while moderating.
- During night missions, moderators will use light up RED arm bands and/or light up PINK necklaces to ensure visibility in the dark.
- Moderators acting as NPCs will have an additional BLUE bandana they will wear on their head or arm. During the night they will have a BLUE light up arm band as well.

I.

THE GAME

Overview

HvZ is Infection.

First there are a few zombies, then they spread.

If you get tagged, you join them.

If you stun them, they back off.

You complete missions and quests to advance your team.

Many try, yet few win.

The Teams

- Humans: They carry weapons, defend themselves, stun zombies to repel them, and complete quests. Their goal is to win the Friday night mission.

- Zombies: Their goal is to infect all humans.
    - This game, we will not have any zombie leadership. Zombies earn rewards for themselves and purchase perks for themselves.

II.

Conduct & Safety

Don’t Be a Schmuck

HvZ relies on an honor system, delicately enforced with the eternal banhammer. Anyone who is found being a schmuck may be eternally punished by flames.

Schmucks

Bullying and Hazing

- Bullying is repeated actions or threats of action directed toward a person by one or more people who have (or are perceived to have) more power or status than their target in order to cause fear, distress or harm. Bullying can be physical, verbal, psychological or any combination of these three.
- Hazing is any action taken or any situation created intentionally that causes embarrassment, harassment or ridicule and risks emotional and/or physical harm to members of a group or team, whether new or not, regardless of the person's willingness to participate.
- These are unacceptable. This goes against the student code of conduct, and any forms will have to be taken to authorities higher than us.
- If sufficient evidence is found, bullying will result in a permanent ban from Nerf-Tech events.
- If you are having any issues with bullying related to the game, feel free to contact the mods at once. Either come up to the desk and we will pull you aside, or message a mod via discord.

Bounties

- Bounties and targeting of specific players is banned. If a player is upset about bounties on their head or is targeted, your moderators will step in.
    - Example: “Tag Mason and I’ll give you a high-five.”

Code of Conduct

- ALL players regardless of student status here at Florida Poly are required to follow the Florida Poly Student Code of Conduct.

Personal Safety

- HvZ is physically active, and you should know your limits. There is no shame or consequence to quitting the game at any time.
- Players are expected to maintain responsibility for their own nutrition and hydration. Water may be available in some instances but is never guaranteed.
- Never endanger players or non-players during gameplay. This includes not entering areas that are in play but pose safety hazards. Be aware of your surroundings.
    - Don’t crowd pathways or carts.
    - Keep distance from non-players.
- If at any time you wish to leave the game for any reason, please reach out to a mod so they can officially remove you.
- Watch your feet; don’t fall into hades or other pits.

Roads

- When crossing a road, you must keep your hands in the air and move briskly straight across the road.
- NO PLAY is allowed while crossing roads, allow appropriate room for players to exit roads
- Players may only cross at specified crosswalks (shown in the **map** section).
- Always stay clear of campus vehicles, such as golf carts, longboards, or police cruisers.

Emergencies and Game Pauses

- When a medical emergency occurs, call 911 first, then mods.
- When you hear whistles go off, you are to immediately stop in place and cease ALL game actions.
- Game pauses are rarely called and used to handle a situation or emergency quickly and safely
- Only mods may initiate a game pause, for this reason please do not carry / use coach whistles, emergency whistles or similar at any time during gameplay
- Report safety concerns to the police

IN THE EVENT OF AN EMERGENCY CALL 911 THEN INFORM THE MOD TEAM

Report safety concerns to University Police then inform the mod team

(863) 874 - 8472	- University Police
911	- Emergency Services

Authorities

- Any campus official (police, professors, staff, etc.) has full authority over the game.
- If you are stopped by a campus authority, explain to them that you are participating in the HvZ game. If they inquire further, direct them to the nearest mod.
- If stopped, cease all gameplay operations while the current situation is being sorted out. Please report any failure to adhere to this to a moderator. Being tagged while stopped by any campus authority will NEVER count against you.

Give the police some space

- Avoid crowding these vehicles.

Lakes

- DO NOT fire darts into or around the lakes. (the university does not like it)
- If a dart ends up in the lake, take the following actions:
    1. Immediately remove yourself from the dart. Further actions or penalties are at play.
    2. Seek out the nearest mod and aid them in retrieving it.
- Further actions or penalties are dependent on mod ruling.
- There shall be no entry to the campus lakes or the grassy areas near them.
- You may walk on the sidewalks near the lakes when not in play, but you should consider the sidewalks out of play when there is active play in the area. Repeatedly entering the sidewalks after mod warnings is a BANNABLE OFFENSE.
- You may cross the small bridges across the lakes, but you must cross from one side to the other without stopping or turning around. No gameplay advantage can be made while on the bridge.
- If an enemy player is exiting the bridge, you must stay back off the paved area to allow them to fully exit the bridge.

Hours of Play

- All gameplay between the hours of 12 am and 6 am are prohibited by campus police.

Bushes

- Hiding in bushes is **not** allowed.

Transportation

- While on campus, you are not allowed wheeled transportation such as a skateboard, bike, scooter, etc.. If you have a car, you should only be using it to leave or get to campus.
- Don’t get dropped off at the IST if you can help it. If you need to be dropped off, please do so at Lot 4. Don’t use the Shuttle during the game.
- If you are a Student worker or are participating in sports, you may temporarily exit the game. Please let a moderator know.

These rules are only in place Thursday and Friday.

Other Factions

- Intentional assistance of another faction at the detriment of your own is NOT allowed.
- You may not eavesdrop comms from another faction or moderators. If you hear a group using a channel, change your channel.
- If you suspect somebody is listening in on communications from the opposing faction, report it to the moderators immediately.
- Non-players
    - Do not seek aid from non-players for shields, information, etc.
    - If a non-player continues to involve themselves, seek out a mod immediately.

III.

Gear

Blaster go brrrr

Blasters

- All blasters must maintain a muzzle velocity of less than 125 Feet Per Second.
- Blasters must be sufficiently bright. All custom paint is subject to mod review.
    - The muzzle must be orange.
- All blasters that are in a “pro” or “performance” line or have been customized or modded must be approved by a mod.
- Permitted ammunition types are: Elite, half, mega, mega XL, N1, rival, demolisher rockets. Darts may NOT be modified, however you may cut elite darts into half darts. Darts must consist of soft rubber and foam, no plastic.

Unauthorized Blasters

- Any blaster that utilizes pre-compressed tanks
- Any blaster firing Nerf Hyper rounds
- Any gel-bead blasters
- Any blaster deemed by a senior mod or head mod to be unfit for play
- Should a mod disapprove your blaster, it is final. Do not argue with the decision. If you disagree, POLITELY take it up with the head moderator.

Good blaster

Blasters - Acceptable Terminology

We have a few no-no words here

“Gun”

“Bullet”

“Firearm”

Instead, we use **blasters** which fire **darts**.
Anyone who makes this mistake should
be reminded by everyone in the area.

~~the police like us more this way~~

Blasters - Conduct

- Treat blasters as if they are loaded at all times. Do not point your blaster at anything you are not intending to shoot at. Keep your finger off the trigger until you are ready to fire. Disarm all blasters when indoors.
- Blasters must be kept in bags if possible. You must remove the mag from a blaster if it uses them. If the battery is easily removable, remove it.
- Melee is NOT PERMITTED unless provided by way of perk by the moderator.

Socks

- A hand-thrown sock may be used to eliminate zombies so long as they adhere to the following rules:
- All socks must be recently cleaned (no biohazards).
- The sock (or pair of socks) must be neatly bound into a ball and secured with tape.
- You are only permitted to throw 3 socks from your hands at any given time
- Socks must leave your hand to be active

Clothing

- Your clothing should be light enough to feel a light tap through. If you are wearing heavier gear, you are still responsible for calling hits on yourself.
- Any clothing or other carried gear will be considered an extension of your body. (its if a zombie tags a blaster, you're tagged kiddo).
- Masks / Clothing blocking the face are NOT ALLOWED
    - Medical masks are allowed
    - Face paint is allowed as long as the majority of the face isn't covered

Gear

- If any gear, including blasters, equipment, or lanterns, are found on the ground, leave them there. If you think the gear is at risk of damage, you may notify a mod of its location.
- Flashlights are limited to 800 lumens and must be HELD, not mounted to your blaster or person. No headlamps. Light up shoes are encouraged. Lanterns are allowed and encouraged over flashlights.
- Remote Activation - devices such as drones, sentry turrets, or anything resembling claymores, mines, grenades, etc. are not allowed.
- Mods reserve the right to review and disallow any piece of gear at any time during the game.

Bandanas

- Humans must always wear their bandana on their arm while in play. The bandana must be worn between the shoulder and elbow and must be worn over all gear/clothing and remain clearly visible.
- Zombies must wear their bandanas on their foreheads when up, and around their necks when stunned.

ID Card

- Each human will be provided with a player ID cards which contains a number used to log infections. You should always have access to this card. If it is lost, you should contact a mod immediately to get a replacement.
    - It will also be sent to your DM via bot.

Dart Cap

6 Darts

Boomer Cones

- Boomer cones are large cones placed by mods for a mission or as a reward. Any zombie who **runs a full circle and a half** around one is allowed to pull their headband up and are then instantly revived.
- Boomer cones will revive ANY zombie, including perk zombies
- Even if a human is near a boomer cone, zombies are allowed to move towards the boomer cone and revive themselves.

When your stun timer runs out

- IMMEDIATELY put your bandanna back up on your head.
  - Do not wait

- Do NOT hide behind or use stunned Zombies as shields.

- Do NOT communicate with stunned Zombies in any way unless you are stunned as well. This includes discord

Starting zombies

Contact the mods about being an OZ

IV.

Combat

Stunning Zombies

- Whenever hit by any dart or sock a zombie must follow these steps:
    1. Immediately call your hit and pull your bandana down to your neck to show you are stunned.
    2. Exit play as quickly as possible.
    3. Stay out of area of play for the extent of your stun timer.
- Repeatedly approaching or interfering with play while stunned may result in a ban.
- If a zombie is already stunned, don't intentionally shoot them again. This is punishable when the act is blatant. Firing multiple darts at once is usually fine.
- The stun timer is told to zombies in the zombie side of the HvZ Discord.

Tagging Humans

- Tap the humans. Avoid tackling.
- When a zombie tags a human, they should do the following :
    1. Take note of the tagged human, identify yourself as the zombie who tagged them, and step out of play with the human.
    2. Take Human ID from the human and keep it safe. If you lose the ID, you cannot register the tag. If the human refuses to provide an ID seek out a mod immediately.
    3. Inform the new zombie of the zombie stun timer.
- Once a zombie makes a tag they have one hour to log the tag. If they make a tag during a night mission, they have one hour after the end of the night mission to log the tag.
- Failure to log a tag in this timeframe will result in the tagged player rejoining the humans, and your tag will not count.
- Additionally, a zombie may make only ONE tag every 15 seconds. Chain tagging will not result in multiple infects with one exception that will be discussed later.
- When you become infected, DO NOT attempt to hand off your blasters to the mods. You are responsible for your equipment.

Human Stun

- Certain zombie perks or bosses will inflict incapacitation.
- When hit:
  - Take a knee.
  - You may rotate in place but not move significantly.
  - You can't use blasters, socks, or any other means of defense for 10 seconds. After 10 seconds, you're back up.
  - You can be helped up in 5 seconds by a second human placing their hand on your shoulder and counting to 5.
- You will be notified if a mission contains human stun before entering the mission.
- Friendly fire is on and isn't Friendly. It will result in human stun.

Honor Duels

- Can be initiated when there is no clear answer about who was tagged out first. Honor duels should only be initiated when there is no other option.
- Honor duels happen between one human and one zombie. Spectating is allowed but is not safe.
- If possible, the players should seek out a mod to officiate the duel
- Both players will reach an agreeable distance before engaging.
- The human may use only one piece of ammo. It can be a dart, missile, or sock.
- The human may not use any other ammo, but they may pick up and reuse the fired ammo.
- If the human tags out the zombie, the human is safe, if the zombie tags the human, the human becomes a zombie.
- The winning player receives 30 seconds of immunity to leave the area.

A little rude

V.

Parts of the Game

Gameplay Between Missions

- For Monday through Wednesday, gameplay between missions is entirely optional.
  - However, if a human has their bandana on, they must keep it on until they're out of play.
  - A human must be playing the game to assist their team or interact with elements.
    - No recon in-play while the bandana is off.
  - A human must wear their bandana while attempting quests or missions.
    - Once a quest is accepted, gameplay is mandatory.
- For Thursday and Friday, human gameplay within any in-play zones is mandatory.

Missions

- Two missions will be conducted each day: One in the afternoon, the other at night.
  - Friday only has a night mission.
- The mission will be announced before it begins.
- Attendance to the missions is not mandatory, but it encouraged if you want to enjoy the game and help your team.
- Completing missions will assist your team, and losing missions will harm it.
- At the end of the game, grace may be called.
  - If a moderator calls “MISSION ENDS, GRACE”, then gameplay is over for participants until they leave the in-play zones.
  - If a moderator calls “MISSION ENDS, NO GRACE”, then the sock bridges and circles become no-play, and gameplay continues until participants return to the IST.
  - Once a human enters the IST circles post-mission, they may not assist their teammates in returning.

Questing

- Quests will be posted at the mod desk.
- Completion of quests will grant rewards.
- Either humans or zombies may be given quests.

Box Hunting

Human Coin Box:

- Can be retrieved and returned by either faction. Rewards humans with coins or offers coin denial if turned in by zombies.

Zombie Coin Box:

- Can be retrieved and returned by either faction. Rewards zombies with coins or offers coin denial if turned in by humans.

Human Objective Box:

- Cannot be interacted with by zombies. Humans must turn in for perks, mission intelligence, etc.

Object Types

- Light - Able to move freely with the Objective, required to use at least one hand to hold.
- Heavy - Must Walk with Objective, and required to use at least one hand to hold.
- Super Heavy - Must Walk with Objective, cannot use socks or blasters while carrying.
- Fragile - Cannot be placed on the ground after picking it up or it will be reset back to its original position by a mod. May only be placed at a designated drop-off zone.

All objects must be carried in your hand(s) regardless of objective type. They may not be stored or carried in any other way. They may not be hidden.

Economy

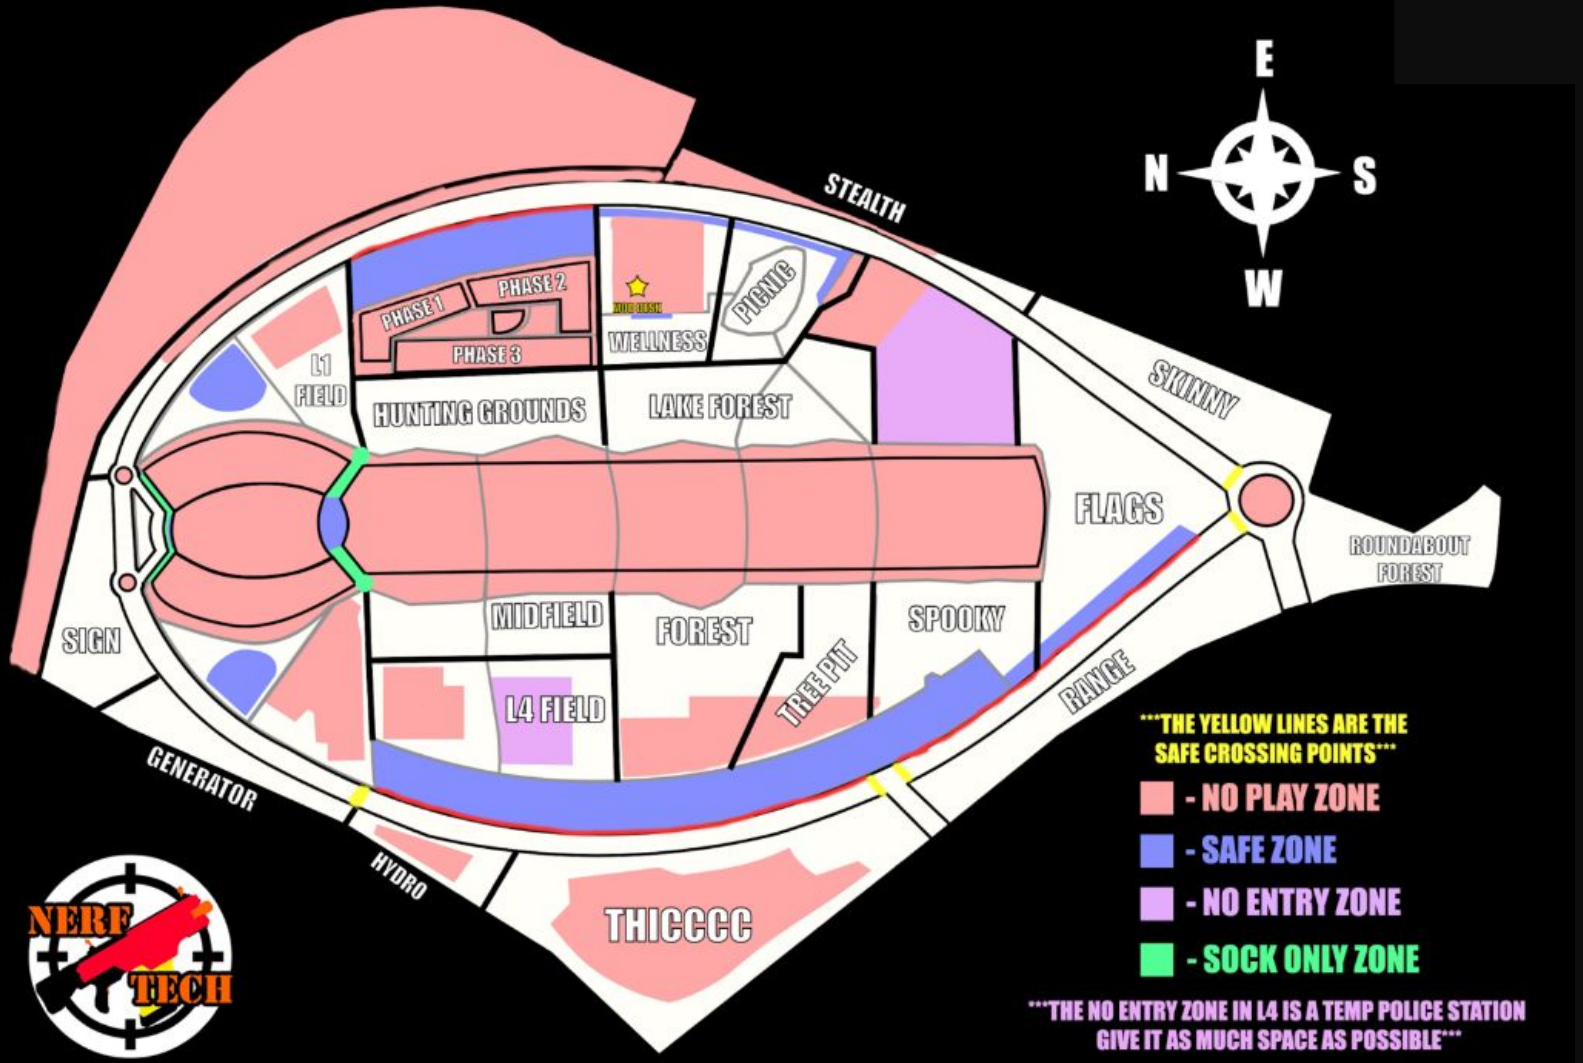

- Players gain coins for certain achievements, and use the coins to purchase perks.
- All players (including zombies) individually earn coins and purchase perks.
- Humans gain coins for completing quests.
- Zombies gain coins for, completing quests, vaccine turn-ins, and picking up darts.
    - Zombies should get the vaccine cards of humans and turn them in at the mod desk for coins.
    - Players keep their coins after infection.

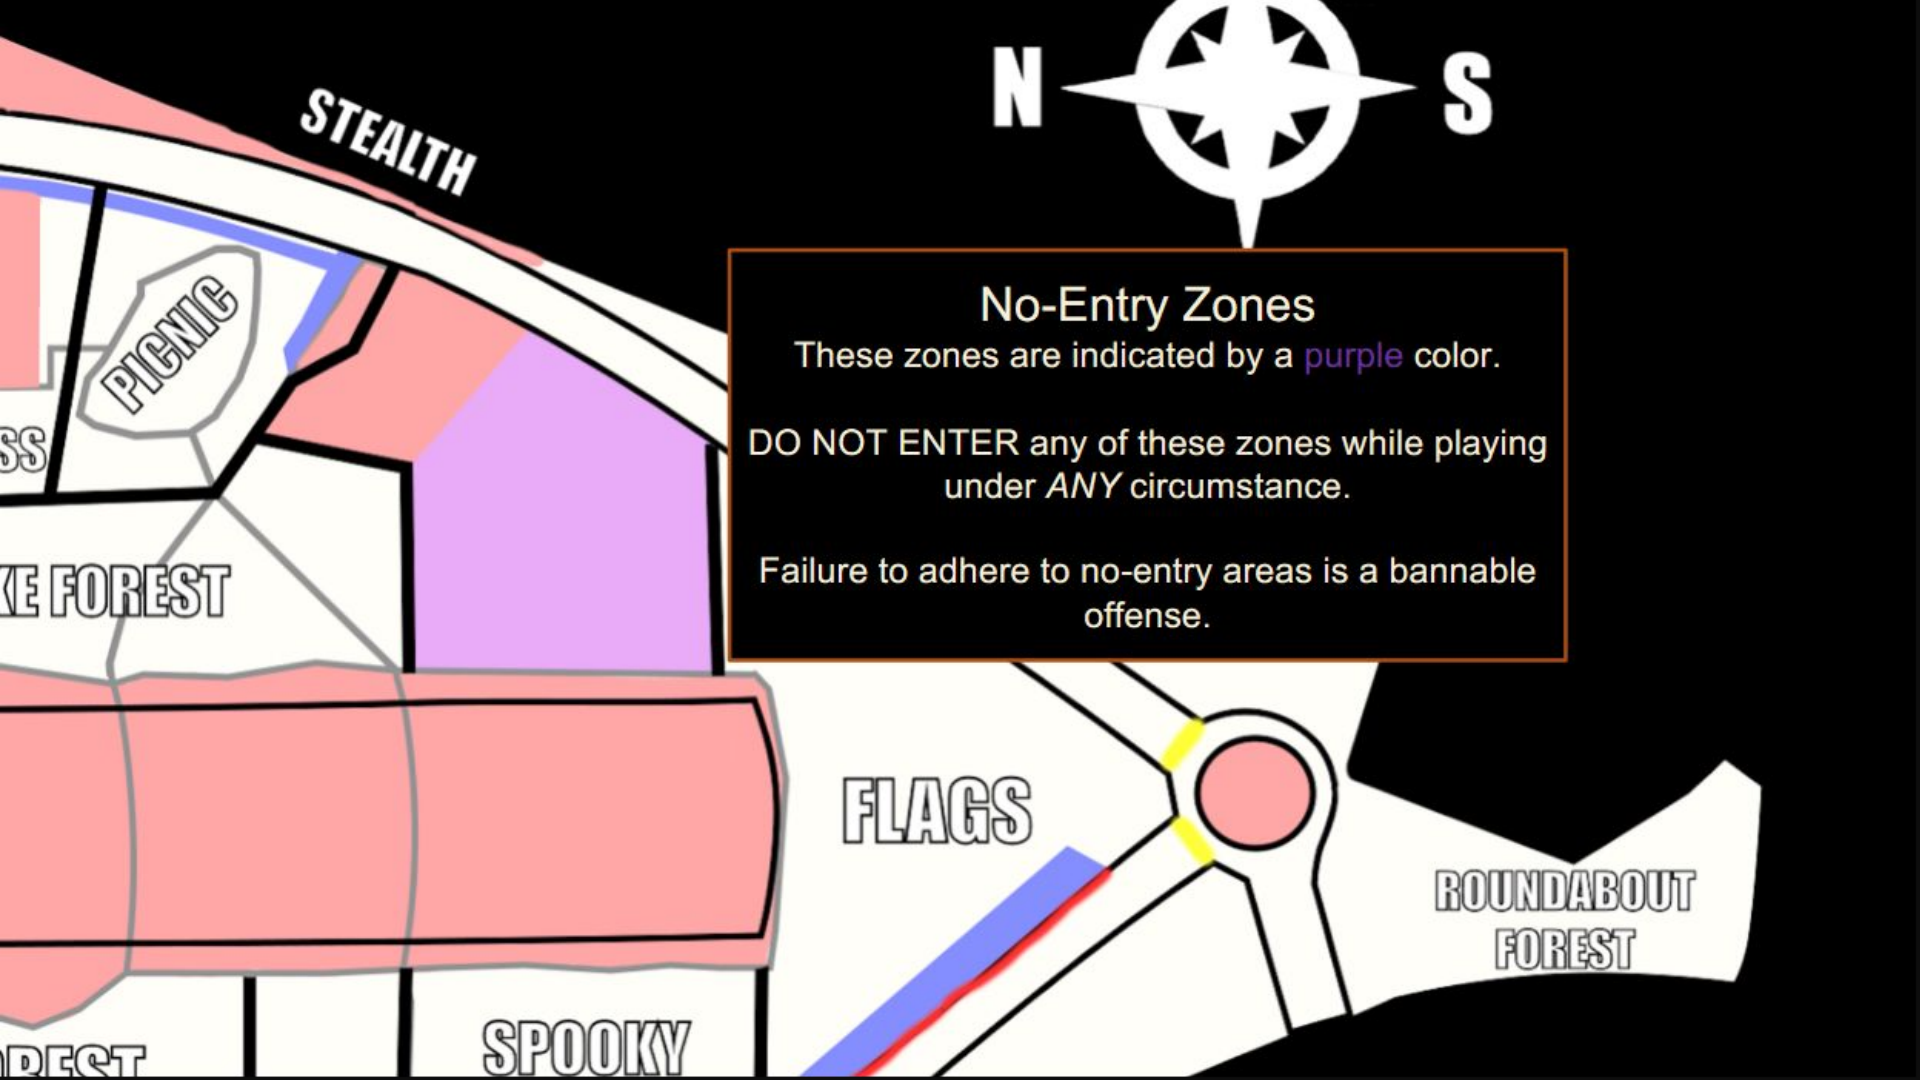

Perks

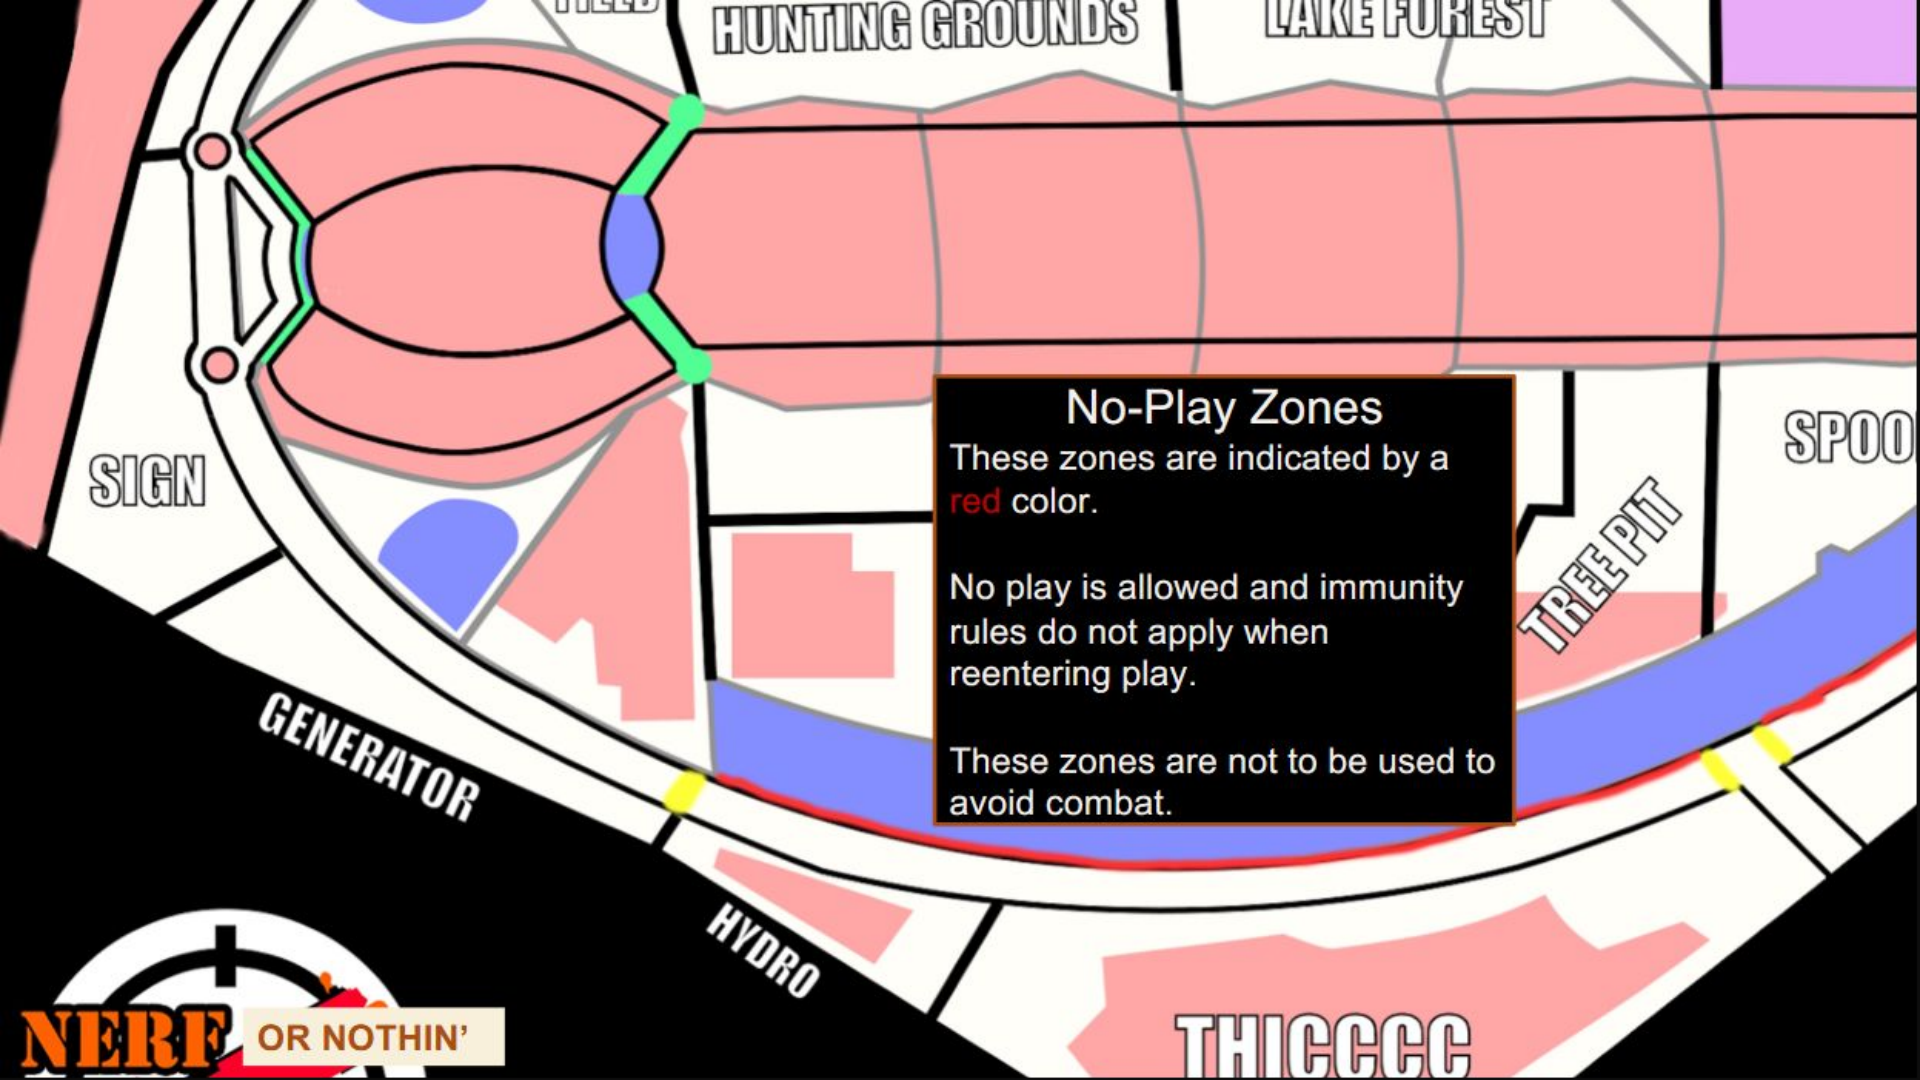

- Perks are items or upgrades which can be bought from the shop or earned as rewards.
- Perks last only one mission unless specified otherwise.

Questions?

VII.

Human Perks

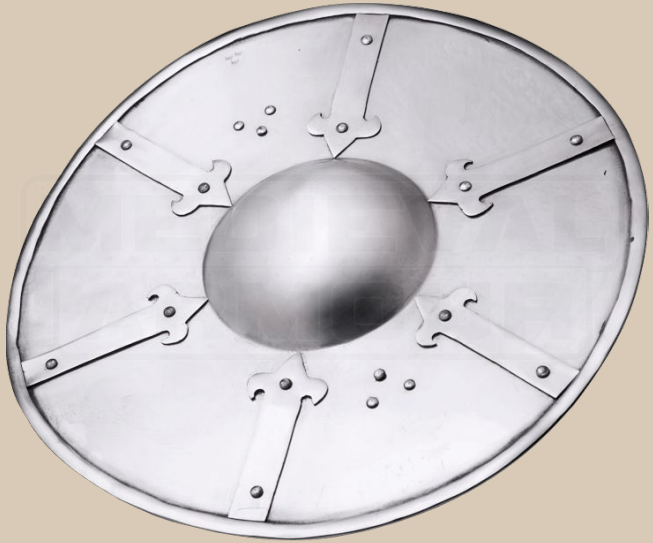

Commando

- Human receives a sword (short pool noodle)
- The sword can be used to stun juggernaut zombies, pierce zombie shields, deflect spitter balls, and parry Z sword strikes.
- Commandos CANNOT use socks, blasters, etc. There is only sword. Don’t throw sword.

Buckler

- A shield is given to a human with this perk
- The shield block incoming spitter balls, Banshee socks, and swords strikes.
- A regular zombie tag will still obliterate you

It doesn’t look like this, unfortunately

Plot Armor

- You will be given a flag football strap with flags attached to it.
- Normal zombies will now have to pull a flag at either side of your waist to infect you.
- Only one flag needs be pulled.
- Spitter can still infect you!

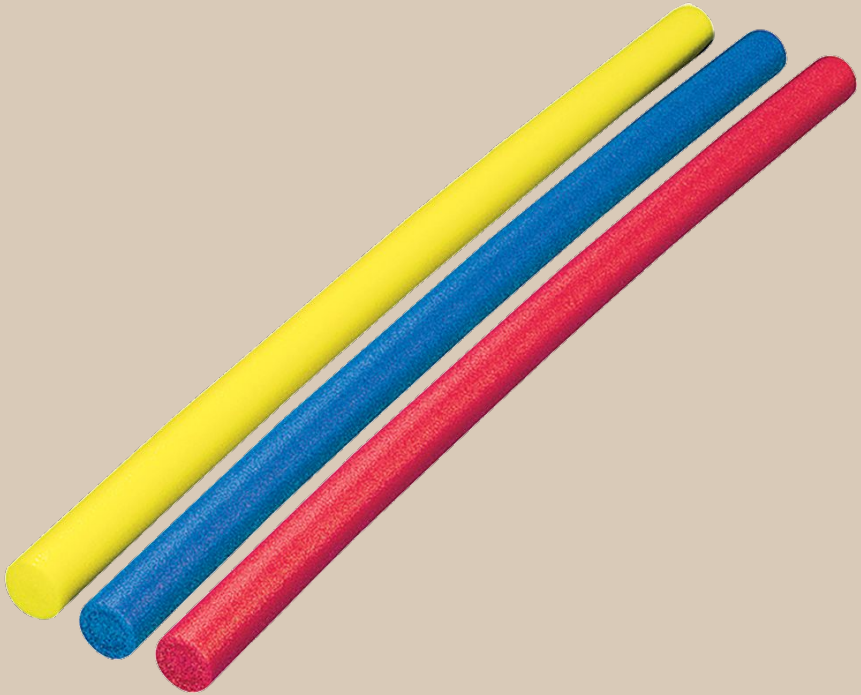

Vaccine

- This perk is a one-time denial of a tag.
- Upon being tagged while holding a vaccine, the user will give the zombie their vaccine in place of their ID and have 30 seconds of tag immunity.
- Can be held all week long until used. NOT STACKABLE.

Barricades

- All zombies are incapable of passing this measly pool noodle on the ground.
- Can be picked up after placing it, however takes 5 seconds to pick up. You must count this time outloud

Flashbang

- The human is given a glowstick necklace.
- Upon cracking this and holding it in the air, they receive immunity for 10 seconds or until they drop the glowstick. Human is out of play during this time.
- The glowstick must clearly be overhead before immunity begins.
- Flashbangs can only be used on the mission after they were purchased.

Ammo Cache

- Before a mission starts, fill a box with as many munitions as you can fit in it.
- This can be deployed in mission for a quick resupply.
- Zombies can’t touch it, but they may guard it if they find it.

Sentry

- A friendly mod who helps out with your tasks.
- They can stun Zs and follow you around.

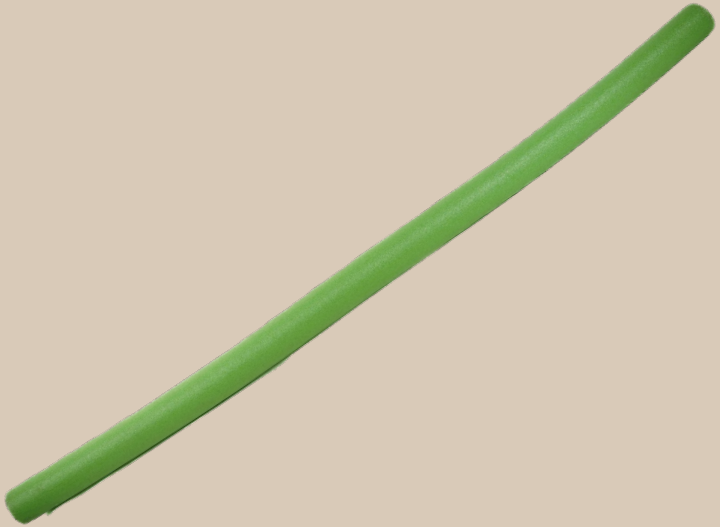

Friendly head of game design

VIII.

Zombie Perks

Sword

- Ability to tag normally is replaced by a full-length pool noodle.
- The sword can be used to deflect darts and socks so long as the sword isn't being bent.
- Functionally cannot infect Plot Armor users.

Shield

- Provided with a shield (there are two types, tier 1 and tier 2) to protect from ALL projectiles.
- User may still infect with normal tags.
- Commando's blade can pierce the shield.

Juggernaut

- Highlighted by a high-visibility YELLOW vest, juggernauts are immune to all darts.
- Can freely move over the human barricade perk
- Can only be stunned by socks, nerf rockets and Mega XL

Oppressor

- Jug vest and shield
- Immune to normal darts.
- Can only walk while active.
- Can self stun and purposefully lengthen self stun timers

Snail

- Upon Stun, Snail is invulnerable for 10 seconds, but may only walk with arms outstretched.
- Wearing a high visibility ORANGE vest.
- Cannot contest hold objectives, they effectively do not count towards hold objectives

Spitter

- The ability to tag normally is replaced with a single dodgeball. This can the thrown and collected until the user is stunned by humans.
- Humans may not interfere with a grounded ball.
- The ball will infect until it touches the ground. Only spitters may touch dodgeballs (other zombies may not reload spitters).

Bowler

- Ability to tag replaced by a yoga ball, the Yoga Ball can deflect shots like the shield perk.
- The Yoga Ball infects on hit
- Remains active until the bowler touches it again.

Banshee

- Marked by a red jersey
- Immune to socks.
- Can pick up thrown socks and throw them back to inflict human stun.
- Can throw maximum of 2 socks at a time
- Can still infect via normal tagging.

Zedic

- Wears a small cone on their head
- May revive one zombie at a time, loudly counting to ten seconds.
- Stunned zombies must remain out of play and Zedic will beckon them over one by one.
- Stunned zombies should form a line and not crowd zedic.

Z-Point

- Hula hoops on the ground.
- They can be placed and picked up by any zombies with the Z-point perk.
- Any human who steps in the Z-Point will be instantly infected.

IX.

WHEN IN DOUBT, ALWAYS REMEMBER

Sportsmanship

Honor

Integrity

Teamwork

Rules Quiz

- Must get a 80% or higher to be able to play.
- Show a mod the results after the quiz is complete (13/15 Required).
- 2 attempts max.
- If you fail your second attempt, you will have to go to second rules meeting.
